

#### NOTES:

1. 0.136 inch mounting holes are to be unplated with a trace and routing keep-out diameter of 0.30 inch
2. Component and trace routing keep-out of .100 inch around the perimeter of the PCB (excluding the DB-9 connector).
3. LCD connector placement location depends on layout specifics.
4. The +12V Connector and +12VAUX connector X-axis placement location depend on layout specifics
